Report of Administrative Audit 2022-23

An administrative audit was conducted by the IQAC on July 19, 2023. The objectives of the audit were to assess the administrative infrastructure and functioning, confirm its fitness for the supported and validated conduct of all the operations of the university, and conclude the due diligence checks. The audit covers a range of administrative, financial, and governance issues, including financial viability, planning, administrative staffing and processes, IT infrastructure, and communications. The personal register of the staff, inward register, and dispatch register were checked. An Unreasonable delay has not been observed in the clearing of files; however, the staff needs training in advanced software related to accounts and for the development of the work culture. The audit was conducted by different divisions of the university administration. The summarised report of the audit is given below:

- The university should maintain records of student progression to higher studies at other universities and for placement.

Admission Cell

- Online admission has been implemented at the university through support of online and ITC cells.
- The whole process of admission should be efficiently managed without fail.
- Counselling of the students must be done for the subject choice before admission.
- Staff should be trained and sensitized to their respective affairs.
- Effective information must be provided about venues and other aspects of admission.

Placement and Counselling Cell

- The workings and progress of the placement Cells are appreciable at present; however, the cell needs to be proactive and sensitize students through regular programmes.
- Different industries and organisations should be invited for student placement.
- A separate office and supporting staff should be established for the effective functioning of the cell.
- The details of the department- or branch-wise internships should be displayed on the university web portal.
- Employer feedback on the offered students may be taken after joining the company or organisation.
- Alumni details need to be connected with the placement cell to bring in more companies for placement.

Engineering Section

- The vacant posts of engineers in the section should be filled for the smooth and efficient functioning of the section.
- Record-keeping should be improved.
- The filling system needs improvements.
- The complainant's register should be properly maintained.
- Quick resolution of complaints related to academic campuses, hostels, and residential campuses
- There should be a proper AMC for RO systems, power back up systems and water coolers in different departments.

Library

- Librarians with competent ICT skills may be appointed on a priority basis for the vacant post.

- Inculcation of library culture
- Display of library facilities on the home page of the university.
- Sufficient fire extinguishers are needed for safety measures.
- Library facility for the visually challenged and orthopedically challenged should be improved through technological intervention.

Information Technology Centre

- The working efficiency of ITC cells is much appreciated.
- The ICT cell should promote or facilitate the facilities in the department for better teaching, seminars, and discussions through online mode.
- Network utilisation should be checked regularly, and it should be functional in a multifarious manner.
- Installation of Wi-Fi in all departments is required with high-speed internet.

Hostel

- Infrastructure must be improved.

- Cleanliness and maintenance require improvement.
- Mechanisms for feedback from hostel students should be made.
- Mess facility should be made robust and compulsory.
- Security provisions should be updated.

Security

- The university has CCTV camera facilities in some places. It would be better to expand this facility all over the campus.
- Fire extinguishers must be installed in convenient places. Here, proper maintenance and monitoring are also required.
- Proper training should be given to guards posted at different points of campus regarding the firefighting system.
